I am a UX-focused mobile developer from a creative background who thinks of mobile development as the best way to affect change in the world. My speciality is Swift and I have developed apps that utilize RESTful API services, native and third party Swift and Objective-C frameworks such as UIKit, MapKit and AlamoFire, and follow Apple's Human Interface Guidelines.

SOFTWARE PROJECTS

Movie Roulette
Project link: github.com/michaelmaryanoff/movieroulette

- iOS application that allows user to pick a random movie when they can't decide what to watch.
- Queries TMDB RESTful API service to find a random movie that meets user's criteria.
- Uses CoreDate and UserDefaults to persist user preferences.
- Intuitive and responsive UI design for seamless usability.
- ***Utilized:*** Swift, CoreData, RESTful API, Apple Human Design Principles, AlamoFire, SwiftyJSON.

Virtual Tourist
Project link: github.com/michaelmaryanoff/VirtualTourist

- iOS application that allows user to place a pin anywhere in the world and view photos from that location.
- Queries Flickr RESTful API service using latitude and longitude data derived from MapKit.
- Uses CoreData to deal with connectivity issues and create a snappy user interface.
- ***Utilized:*** MapKit, Flickr RESTful API, asynchronous programming, CoreDate, URLSession (no external libraries).

Simple Coffee Calculator
Project link: apps.apple.com/us/app/simple-coffee-calculator/id1455234543

- iOS application currently ranking in the app store for search term "Coffee Calculator."
- Simple, intuitive UI design for calculating coffee-to-water ratios.
- ***Utilized:*** UIKit, Apple Human Design Principles, Apple Store Connect, TestFlight, graphic design and color theory.
